

Ubuntu Cinnamon minimal install recommendations (based on 24.04 LTS)

```
sudo apt install ubuntu-cinnamon-desktop-minimal --install-recommends
```

Slick-greeter issue resolving

```
sudo apt purge unity-greeter && sudo apt autoremove
sudo rm /usr/share/glib-2.0/schemas/10_ubuntu-cinnamon-environment.gschema.override
sudo nano /usr/share/glib-2.0/schemas/10_ubuntu-cinnamon-environment.gschema.xml
```

Content:

```
<?xml version="1.0" encoding="UTF-8"?>
<schemalist> </schemalist>
```

Close with CTRL+X to save

```
sudo glib-compile-schemas /usr/share/glib-2.0/schemas
sudo apt install slick-greeter --reinstall
```

Network applet issue resolving

Edit default netplan to add/specify the renderer:

```
sudo nano /etc/netplan/50-cloud-init.yaml
```

Add the line after "network:"

```
    renderer: NetworkManager
```

Close with CTRL+X to save

PS: Do not apply netplan before first reboot after Cinnamon install (will apply automatically while system loads with new environment)

Faster boot due to unused network components

```
sudo systemctl disable systemd-networkd-wait-online.service
```

Reboot required for appliance. Best is ones all above are done restart ones for all.
